

ATTENTION ANGLERS REWARD FOR CAPTURE

2022 JUVENILE STRIPED BASS TAG RETENTION STUDY

Keep an eye out for striped bass/rockfish in the Chesapeake Bay with one or two, green and/or blue tags near their dorsal fin. This is a new recreational angling based study to better understand tag retention rates and migratory patterns of these important fish. Please report the serial number on each tag upon recapture.

**REPORT YOUR CATCH OR
FIND OUT MORE AT
TAGCHESAPEAKE.ORG**

Legal sized fish may be retained, but we would appreciate you releasing your catch to continue the story told by each tagged fish and those who catch them.
